

Carolinas Chapter

In response to the question on the suitability of sub-title D landfills to handle e-waste disposal safely, the North Carolina Chapter of the National Waste & Recycling Association offers the following statement:

It is our opinion that e-wastes could be disposed within our Subtitle D landfills as long as proper consideration of the issues that could create toxic conditions within our landfills are resolved, including the costs associated with properly abating these potentially-toxic conditions.

This statement is provided on behalf of the North Carolina Chapter of the National Waste & Recycling Association (NWRA). NWRA is an association of privately owned solid waste management companies that provide collection, recycling, disposal and engineering services throughout the United States. The North Carolina Chapter is comprised of members within the State of North Carolina. Our members play a critical role in providing the infrastructure to assure adequate waste and recycling services exist to protect the State's environment.
